2. Information on compliance of the packaging material

As the supplier, we confirm that the packaging material listed above, including any added color masterbatches, meets the following requirements of Regulation (EU) 2025/40 (PPWR) in order to assist the manufacturer with their conformity assessment:

- Minimization of substances of concern (in accordance with Article 5(1) of the PPWR): The material is designed to minimize the presence and concentration of substances of concern.
- Heavy metals (in accordance with Article 5(4) of the PPWR): The sum of the concentration levels of lead, cadmium, mercury, and hexavalent chromium in the supplied packaging material does not exceed 100 mg/kg.

3. Recyclability (in accordance with Article 6 of the PPWR) and minimum recycled content (in accordance with Article 7 of the PPWR)

With regard to future requirements for the recyclability of packaging and the mandatory minimum use of post-consumer recycled materials (PCR), we would like to point out the following:

- Recyclability: The binding criteria for design for recycling, as well as the methodology for classifying products into recyclability performance classes (A, B, or C), have yet to be established by the European Commission through delegated acts (in accordance with Article 6(4) and (6) of the PPWR).
- Minimum recycled content: Similarly, the exact methodology for calculating and verifying the recycled content, as well as specific requirements for documentation, are still pending in implementing acts of the European Commission (pursuant to Article 7(8) of the PPWR).

Since it is not yet possible to provide a definitive and legally binding confirmation regarding these points without the European Commission's final evaluation criteria, we reserve the right to withhold this information. We are continuously monitoring regulatory developments at the EU level. As soon as the pending delegated acts and implementing acts regarding Articles 6 and 7 of the PPWR have been adopted and the technical specifications are available, we will assess the packaging material we supply accordingly. We will then provide you with an updated version of this supplier information containing the necessary data to support your conformity assessment.

4. Note regarding the manufacturer's obligations

The provision of this information does not constitute an EU declaration of conformity. Pursuant to Article 15 of the PPWR, it is the responsibility of the manufacturer to carry out the conformity assessment for the finished packaging unit. Obligations concerning empty space restrictions (Art. 24) or labelling requirements (Art. 12) are beyond the supplier's control and must be the responsibility of the manufacturer.
